

Practice Integration Profile

PIP 1.0

WF	Workflow
1	...we use a standard protocol to identify, assess, treat, and follow up patients who need or can benefit from integrated Behavioral Health (BH).
2	...we use registry tracking to identify <u>and</u> follow patients with identified BH issues.
3	...we coordinate clinical care and or provide bidirectional communication for patients with BH issues who would benefit from specialty services (not primary care).
4	...we connect patients with BH issues to non clinical community resources.
5	...we provide referral assistance to connect patients to specialty mental health resources.
6	...we use a standard approach for documenting patients' self-management goals.
CS	Clinical Services
1	...we have clinicians available on site who provide <u>non-crisis</u> focused BH services.
2	...we have clinicians available on site to see patients in behavioral <u>crisis</u> .
3	...we have BH clinicians who can see seriously mentally ill and substance-dependent patients.
4	...we offer behavioral interventions for patients with chronic/complex medical illnesses.
5	...we offer complex or specialized behavioral health therapies.
6	...we offer evidence-based substance abuse interventions.
7	...we offer prescription medications for routine mental health and substance abuse diagnoses.
8	...we offer prescription medications for serious complex co-occurring mental health and/or substance abuse diagnoses.
9	...we offer referral to non-clinical services outside of our practice.
WS	Workspace
1	...BH and medical clinicians work in:
2	...patient treatment/care plans are documented in a medical record accessible to both BH and medical clinicians.
IN	Shared Care & Integration
1	...BH and Medical Clinicians regularly and actively exchange information about patient care.
2	...there are regular educational activities including both BH and Medical Clinicians.
3	...BH and Medical Clinicians regularly spend time together collaborating on patient care.
4	...patients with BH needs have shared care plans developed jointly by the patient, BH and Medical Clinicians and updated over time.
ID	Case Identification
1	...we screen eligible patients for at least one BH condition using a standardized procedure.
2	...we use practice-level data to screen for patients at risk for at least one complex or special need.
3	...patients are screened at least annually for at least one behavioral conditions related to a chronic medical problem.
4	...patients are screened at least annually for lifestyle or behavioral risk factors.
5	...screening data are presented to clinicians prior to (or at) patient encounters with recommendations for patient care.
EN	Patient Engagement
1	...we successfully engage identified patients in Behavioral Care.
2	...we successfully retain patients in Behavioral Care.
3	...we have specific systems to identify and intervene on patients who did not initiate or maintain care.
4	...we have follow-up plans for all patients whose BH needs are resolved.
